

**Best**<sup>®</sup>  
Theratronics

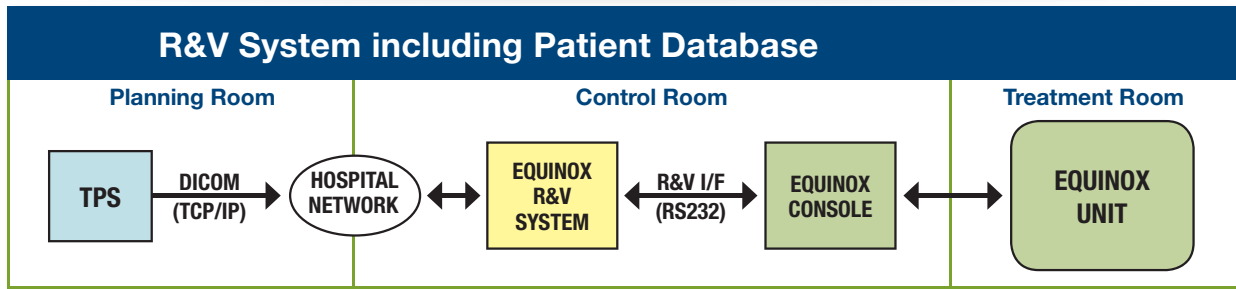

**The Best Theratronics Record and Verify (R&V) System  
exclusively designed for GammaBeam Teletherapy Systems**

**GammaBeam**<sup>™</sup>  
**RECORD & VERIFY SYSTEM**

The Best Theratronics Record and Verify (R&V) system is optimally designed as an accessory for the Equinox teletherapy machine. It automatically verifies Equinox treatment parameters before allowing treatment to proceed and then records the treatment history in a patient database.

Planned	Actual	Wdgdy ID	Planned	Actual
Gantry: 0	320	030	000	
Collimator: 0	0	Trst ID: 876	912	
X1: -3.5	-15.0	Aux Z: -10.8	-10.8	cm
X2: 3.6	17.0	Aux X: -7.8	-7.8	cm
Y2: 3.1	15.0	Aux Y: 18.0	18.0	cm
Y1: -4.2	-16.0	Aux I: 0	0	cm

- Treatment plans in DICOM-RT format can be imported from the hospital network and stored in the R&V Patient Database
- Patient Database captures treatment details for each beam of all sessions and can be backed up and exported
- Treatments facilitated by automatic parameter transfer and full remote auto-setup of Equinox, all from within the control room
- More efficient patient throughput in comparison to manually typing in treatment parameters at each treatment session
- Increased safety by automated treatment process, eliminating risks of operator error
