

TeamBest Offers Their Total Solutions™ to Customers

Founded in 1977 by company President Krishnan Suthanthiran, Best Medical International, Inc. continues to grow after more than 30 years. Best Medical's family of companies, collectively known as TeamBest, is a vertically-integrated social enterprise that has developed a reputation for being the best and most experienced in the field of radiotherapy products and instruments. TeamBest's goal is to reduce health care costs by controlling the supply chain and manufacturing costs. Along with their unmatched customer service, TeamBest can provide you with Total Solutions™ for all of your radiotherapy products and instruments.

Best Medical International, Inc.

Best Medical manufactures Best® Iodine-125, Best® Palladium-103, Iridium-192 and Gold-198 seeds, along with LDR/HDR accessories, fiducial markers, the Best® Brachytherapy Kit and several customized products. Seeds are available either loose or loaded in cartridges, needles or strands, and are available sterile or non-sterile.

Best Theratronics Ltd.

What is better than Cyber, Rapid, SRS or Tomo? Best® Gamma Teletherapy™. It's a game changer. Best® Gamma Teletherapy™ systems, or Theratrons, have provided low-cost, dependable service worldwide for more than 50 years. Their systems have significantly lower operating costs — almost 70 percent less than linear particle accelerators, or linacs. Millions of cancer patients around the world have received treatment on Theratrons. These systems are available from Best Theratronics with a number of financing options available.

Best NOMOS

For the Best® Total Solutions™ for prostate cancer diagnosis and treatment, Best NOMOS provides the Best® Sonalis™ featuring breakthrough SimulView™ ultrasound technology, with simultaneous images of transverse and sagittal planes. Their BATCAM ultrasound-based image-guided radiation therapy units are the proven method for prostate localization during multifractional IGRT treatment.

Best Medical Canada

The mobileMOSFET Wireless Dose Verification System, available from Best Medical Canada, provides accurate, real-time patient dosimetry information during radiation therapy or diagnostic imaging. Best Medical Canada supplies Canada with all of the products offered by TeamBest.

Brachytherapy Services, Inc

TeamBest's newest company, Brachytherapy Services, Inc., formerly a division of NAS Medical, also provides Iodine-125, Palladium-103 and accessories, along with the STP 110™ Precision Stepper.

CNMC Company

Best® Total Solutions™ provide for physics instrumentation and radiotherapy product needs — all makes, models calibrations and repairs. CNMC Company has supplied medical physicists with quality products for radiation dosimetry and quality assurance for more than 20 years. Their well-established relationships with multiple vendors enable them to supply most of the products you need, including hard-to-find items. CNMC can also repair your broken instruments, saving you many thousands of dollars, and sometimes can provide you with a loaner.

Arplay Medical

Arplay Medical supplies head, neck, thoracic and abdominal thermal plastic immobilization products.

In addition, integrated couch-top breast boards for CT and accelerators are available.

Best Vascular, Inc./Novoste

In the early 1990's Best Medical sponsored research and clinical trials using radiation to treat restenosis, or reclogging, in coronary arteries. This was very successful and resulted in a procedure known as vascular brachytherapy, or VBT. The Food and Drug Administration approved this procedure in November 2000 for treatment of coronary artery in-stent restenosis. Since then, the procedure and Best's VBT products have been marketed globally. The Novoste™ Beta-Cath™ System is available through Best Vascular.

Huestis Medical

Huestis Medical is a well-known ISO 9001:2000 manufacturer of quality radiotherapy products, which include the Huestis-Cascade NT™ radiographic/fluoroscopic simulator, the Huestis Styro-Former™ manual block cutter, the Huestis Compu-Cutter™ III computerized block cutter, the Huestis Compu-Former™ tissue compensator for intensity modulated radiation therapy and other radiotherapy procedures. Huestis Medical is also the world's leading remanufacturer of diagnostic imaging products ranging from GE AMX portables, GE R&F rooms, OEC C-arms, Liebel-Flarsheim urology suites, and mammography, computed tomography and magnetic resonance systems. In addition, Huestis Medical manufactures collimators for a wide range of x-ray applications and radiotherapy accessories.

Huestis Industrial

Huestis Industrial is a dynamic global leader in specialized wire, cable and fiber optic machine production. ISO 9001:2000 registered manufacturing supports the acclaimed Air-Miser air-wipes, the Bendmaster IITM CNC tube bender, cable jacket strippers, pay-off/take-up stands, accumulators, buncher payoff stands, and standard and fiber-optic spoolers.

Best Cyclotron Systems, Inc.

One of the Best family's newest team members is Best Cyclotron Systems, Inc. The goal of BCSI is to design and manufacture cyclotrons for use in research, diagnosis and treatment applications at universities and hospitals around the world. BCSI will provide various alternatives to Technetium 99m and make them readily available for medical diagnosis and treatment. Building and installing one 14 MeV, two 35 MeV and one 70 MeV cyclotrons for the production of medical isotopes will significantly increase the supply available to the medical community. The cyclotrons will be manufactured by Best Theratronics and used in the United States for PET-CT applications and isotope production of Pd-103, Cs-131, Sr-82 and other medical isotopes. Installation is scheduled to start in 2010 and be completed by 2013. The company intends to offer these systems to customers with flexible payment terms.

CURE Foundation

In keeping with their goal of affordable and accessible quality health care, Suthanthiran established the non-profit CURE Foundation in 2007 to promote health care and education globally. Its mission is to keep the healthy person healthy. Should a person become sick, the goal is early detection, effective treatment and total cure, or Total Health™. The foundation plans to work with citizens, medical professionals, government and non-governmental organizations, educational institutions and charities around the world to eradicate contagious disease, malnutrition and poverty, and provide superior health care at

low costs. CURE Foundation plans to set up a number of express and mobile clinics and medical centers by raising capital through public and private partnerships.

TeamBest

Information on all the TeamBest companies can be found at www.teambest.com. They can be your single-source supplier for brachytherapy, radiology, urology, neurology, radiation therapy, cardiology, gynecology, medical and health physics. ■

Best® Total Solutions™ for Prostate Cancer Diagnosis & Treatment

Best® Gamma Teletherapy™ Systems

Can be equipped or upgraded with the latest IMRT, IGRT & SRS technologies including:

- Multi-leaf collimator (MLC) for IMRT
 - nomosSTAT™ Serial Tomotherapy
 - CORVUS™ Treatment Planning Systems with forward & inverse planning
 - kV (single or dual detector) or MV imaging-based IGRT solutions
-
- Can be operated on a generator or solar power
 - Operate on 115 V AC or 230 V AC single phase, 2 kVA & require no special cooling

These upgrades cost significantly less than comparable Linac based solutions with lower operating costs!

We have a number of financing options with low investment & monthly payments.

A Breakthrough in Ultrasound Technology – Best® Sonalis™ Imaging System Featuring SimulView™ Ultrasound Technology

New!

The Best® Sonalis™ Ultrasound Imaging System provides superior visualization of HDR, LDR, RF or Cryosurgical procedures. Our patented SimulView™ Technology provides simultaneous “live” views of the prostate in both planes, thereby increasing treatment accuracy & precision.

- ▶ Simultaneous imaging of transverse & sagittal planes
- ▶ 140 mm Longitudinal Array allows the user to view the entire prostate gland

CNMC & mobileMOSFET

Electrometers

Water Phantoms

Physics Accessories

mobileMOSFET

- ▶ Routine in-vivo dosimetry
- ▶ One or multiple field measurements
- ▶ Treatment plan verification
- ▶ IMRT in-vivo, QA & phantom work
