

An Open Letter to the Prime Ministers of Canada and India, the Premiers of Alberta and British Columbia, and First Nations Leaders

WASHINGTON, DC, UNITED STATES, October 1, 2025 -- In an online newsletter received this week by Dr. Krishnan Suthanthiran from the Prime Minister of Canada, the Honorable Mark Carney, Carney outlined Canada's greatest strengths—its abundant natural resources, its people, and a renewed national spirit of self-reliance and forward momentum. Carney's vision of one Canada and a strong, unified economy deeply resonates with Krishnan Suthanthiran, President and Founder of TeamBest Global Companies.

Suthanthiran arrived in Canada in the fall of 1969 and earned a Master's degree in mechanical and aerospace engineering from Carleton University, Ottawa, in 1971. For more than five decades he has been building and operating businesses across Canada, including one of his key ventures—Kitsault Energy (KE)—located in Kitsault, British Columbia, Canada, a region uniquely positioned to support Canada's economic growth and India's future energy security and prosperity.

Canada has vast energy resources. The time has come to unlock their full potential—not just for its own prosperity but to bolster important international partnerships, especially with India.

India, a growing economy with nearly 1.5 billion people and brilliant minds, currently depends on more than 40 countries to fulfill its energy needs. In 2016, Suthanthiran met with the CEO of Indian Oil and India's then-Minister of Petroleum and Natural Gas in Vancouver, British Columbia, during an energy summit. At that time, he proposed a strategic partnership for long-term crude oil (Western Canadian Select) supply at \$40 per barrel and natural gas at \$2 per million BTU, exported through KE's dedicated energy port and terminal at the Observatory Inlet. Unfortunately, this proposal was not pursued, as India had existing commitments with Petronas. Subsequently, India faced a major setback when Petronas canceled its LNG project in Canada, leading to the loss of nearly \$500 million USD in investment.

Kitsault Energy Pipeline Route

Observatory Inlet

Suthanthiran is leading the KE project with a bold vision: to supply crude oil and natural gas in the form of liquid butanol to India through dual pipelines extending to the west coast of British Columbia, near Kitsault and Observatory Inlet (Spectra Energy/Enbridge already has two pipeline routes to the region, approved by the former National Energy Board of Canada). The plan includes establishing a floating butanol manufacturing facility at Observatory Inlet, a dedicated energy export port and terminal, and transporting crude oil and natural gas to produce and export liquid butanol—a cleaner-burning fuel with broad applications. Butanol offers advantages over LNG in cost, distribution, and port receipt, without requiring multi-billion-dollar infrastructure investments.

Vessel Transit Times

This project would promote Canada's economic prosperity, reduce India's energy supply fragmentation, and provide India with a reliable and strategic energy partner. Butanol not only reduces automotive pollution when used instead of gasoline or diesel, but it also serves as a clean-burning fuel for natural gas power generation—aligning with India's and global emissions reduction goals.

India can establish long-term supply agreements with Canadian energy companies for natural gas and crude oil at reduced prices, similar to its current deal with Russia. Canada, along with the provinces of Alberta, British Columbia, Saskatchewan, and the First Nations along the KE pipeline route, will see significant benefits from investments totaling tens of billions of dollars in KE's dual pipeline energy project—gaining tax revenues, creating jobs, and supporting job training. Additionally, the Best Cure Foundation—registered as a non-profit in Canada—plans to establish Pro Health Centers, offering proactive, preventive, primary medical, dental, and eye care wellness services.

The benefits are substantial, with a multi-billion USD housing infrastructure available at Kitsault and KE already holding the necessary regulatory approvals. As India seeks to actively collaborate with Canada, this will serve as a strong incentive for both nations to finalize a free trade agreement that has been under discussion for nearly a quarter of a century!

Dr. Suthanthiran is eagerly looking forward to engaging with all stakeholders.

About TeamBest Global Companies

TeamBest is a multinational medical company founded in 1977 in Springfield, Virginia, USA. TeamBest is driven by one primary goal—to provide the best products and services to customers. The TeamBest family of companies, collectively known as TeamBest Global, has been proudly developing, manufacturing, and delivering reliable medical equipment and supplies for www.bestcure.md more than 50 years. TeamBest includes over a dozen companies offering complementary products and services for brachytherapy, health physics, medical physics, radiation therapy, blood irradiation, vascular brachytherapy, imaging, medical particle acceleration, cyclotrons, and proton-to-carbon heavy ion therapy systems. TeamBest is the single source for an expansive line of life-saving medical equipment and supplies. Its trusted team is constantly expanding and innovating to provide the most reliable products and technologies.

Today, TeamBest employs hundreds of talented engineers, scientists and others, offering thousands of products and services. TeamBest's independently-owned companies are proud to be represented in North America, Europe, Latin America, Africa, the Middle East, and Asia. "Everyone deserves the Best healthcare. We aim Krishnan Suthanthiran, TeamBest Global to work with medical professionals to Companies/Best Cure Foundation provide the Best products, technologies and services. Our mission is to uphold our reputation for excellence in the healthcare field by developing, manufacturing and delivering cost-effective, high-quality products to benefit patients worldwide," states Krishnan Suthanthiran.
